**(54) Title:** METHOD FOR DEODORIZING LARGE-SCALE PLANTS

**(57) Abstract:** The invention relates to a method for deodorizing large-scale plants, in which solid or liquid malodorous materials are stored, by means of treatment of the unpurified air above the surface of the malodorous materials with active agents which react with or mask malodorous substances in the air. The active agents are dispersed in a matrix of crosslinked polymers comprising hydrophilic groups and together with the above form a spongelike composition from which the active agents are slowly released and vaporized. The spongelike composition is incorporated between two parallel plates (3), which are mounted above the surface of the malodorous materials or at the edge of the large-sized plant and an airflow runs between the plates (3) and releases the active agents.
